Summary:

I'm a Web Developer working in JavaScript, HTML5, CSS3, React, Node and Ruby on Rails. Prior to becoming a web developer, I worked as an Accounts Receivable Specialist at Promesa USA. My responsibilities included tracking orders, confirming transactions/payments, and maintaining records. Currently, I'm working on freelance projects including a React web app called ChatApp.

Technical Skills:

- **Languages:** JavaScript, HTML5, CSS3, Ruby
 - **Frameworks & Libraries:** React.js, Express, Node.js, Rails, jQuery, Bootstrap
 - **Databases:** MongoDB, PostgreSQL
 - **Other Technologies:** Git and Github, Heroku, AWS, JSON Web Tokens, AJAX, SASS, WordPress, Passport.js, Socket.io, Google Maps API, Twilio API, API.AI
-

Projects:

1. ChatApp

A web application, for users to communicate through chat. Users have the option of chatting in a global chatroom, private chatrooms, or to a ChatBot. This application was built using HTML5, CSS3, JavaScript, React.js, Node.js, Express, MongoDB, Bootstrap, JWT, Socket.io, and API.AI.

2. But First, Coffee

A full-stack application for users to find local coffee shops and review them. This application was built using Ruby on Rails, HTML5, CSS3, and Bootstrap.

3. Dozer

A web application that alerts the user through call or text when they are approaching their destination. This application was built using Node.js, Express, AJAX, HTML5, CSS3, JavaScript, Passport.js, Bootstrap, MongoDB, Twilio API, and Google Maps API.

4. Tag, You're It

A two-player game of tag. This game was built using HTML5, CSS3, JavaScript, and jQuery.
